WE CANNOT POSSESS CREATION

An economic system centered on the deity money also needs to plunder nature to sustain consumption at the frenetic levels it needs. Climate change, the loss of biodiversity, and deforestation are already showing their devastating effects in terrible cataclysms which we see and from which the humble suffer the most – those who live near the coast in humble dwellings, are so economically vulnerable that they lose everything due to a natural disaster. Brothers and sisters, creation is not a possession that we can dispose of as we wish; much less is it the property of some, of only a few. Creation is a gift, it is a present, it is a marvellous gift given to us by God so that we might care for it and use it, always gratefully and always respectfully, for the benefit of everyone.
